Office Action Summary	Application No. 10/642,842	Applicant(s) NOYES ET AL.	
	Examiner Melvin A. Cartagena	Art Unit 3754	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 29, 2005 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 5, 8-12, 15 and 18-22 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5,427,279 to Kaufman.

Kaufman shows a dispenser with reservoir as seen in Figs. 1 and 2 having a hand held container 22 with an opening 34, a seal 44 with openings 46 offset in the vertical direction, a cap 24 engaging the opening, a delay chamber 38 with a floor and a drain 26 raised above the floor, water flow from the containers through the openings 46 to fill the delay chamber and air flows through the drain as the chamber fills, see column 1, lines 53-65.

With respect to claims 11 and 21:

The drain outlet is larger than the first seal holes.

With respect to claim 20:

In Fig. 3 the outlet is shown partially curved.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 23 is rejected under 35 U.S.C. 103(a) as being unpatentable over US 5,542,605 to Campau in view of US Patent Application Publication US 2003/0126691 A1 to Gerlach et al.

Campau shows all claimed limitations as discussed above and performs the method of filling the container with water in an upright position, attaching the cap to the container, turning the container over to a downward dispensing position, flowing water from the container through the first hole in the seal into the chamber in the cap, passing air from the cap through the second hole in the seal and into the container, Campau is silent about placing the container into a drying cabinet. Gerlach shows a container 106 as seen in Figs 8 and 6, placed in a cabinet for in-home fabric treating. It would have been obvious to a person with ordinary skill in the art at the time the invention was made to place the container of Campau in a cabinet as taught by Gerlach to provide humidification to a single desired article in a closed spaced, see page 3, lines 3-11.

Allowable Subject Matter

6. Claims 3, 4, 6, 7, 13, 14, 16 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments with respect to claims 1, 2, 5-12 and 15-23 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Benecke shows a gear pump and replaceable reservoir for fluids.
